Respected Sir

Sub: Infrastructural requirements for DIMS (Patient management software) . .

The smooth working of DIMS (Patient management software) in the institute requires some basic infrastructure. Since we are planning for a complete paperless system for managing the patients, lack of sufficient infrastructure will create serious delays for the patients and their treatment. 3. ID card printer for providing patient registration cards.
4. Barcode reader in reception and oral medicine department.
5. Scanner in Reception to scan consent forms.
6. Tablet PC has to be increased in all departments to a minimum of 3 nos. per department.
7. Purchase of Microsoft SQL server 2017/2019 as this license is required for the DIMS software.

Based on this, following purchase are required.

This is to bring to your kind notice that, Department of Orthodontic is using an Orthognathic Surgery planning software - NEMOFAB from 2017 onwards which is used to plan and simulate the treatment outcomes of Orthognathic surgeries. This software is currently almost 5 years old. There is a provision in the software where in Surgical splints can be designed and exported in STL format for 3D printing. However this feature requires an Annual Maintenance Contract (AMC) to be in place for using. AMC if in place will also upgrade the current software to the latest version. The total cost for AMC (quotation enclosed) is Rs. 1,29,800/- (including GST)

Sir, I request you to kindly approve the payment of the same.

Thanking you

SUBJECT: Requesting for the dental camp

We work for improvement of underprivileged children for betterment of the society. We have noticed that the oral health and the awareness about oral health is minimal in these children. We humbly request you to arrange a free dental camp at our orphanage to improve the oral health status of our children.

Kindly help us in this regard. We look forward to your positive reply.
