3.4.4 Mention the extension activities conducted in the neighbouring community in terms of impact and sensitizing the students to social issues and holistic development

Response: Institutional Social Responsibility is a way for our institution to contribute to society by addressing local challenges and providing the health care to the weaker sections of society. We always create awareness among students and staff about their responsibility for societal development and aim at instilling social values and moral responsibility. We are associated with communities and civil society to serve unprivileged school students, orphanages, and old age homes to improve health systems performance and people's oral health status. Affordable patient care is also provided at the institution to a constantly increasing footfall.

Institution has tied up with various satellite clinics in collaboration with the State government PHCs to provide service to the general public. Faculty and students are thoroughly trained in biomedical waste disposal within the campus and at extended community outreach programs also.

Camps are conducted regularly at BMTC bus depots and Police stations to provide oral health care to the serving communities. Blood donation camps are conducted. We are working towards becoming sustainable campus by recycling water.

Yoga day is celebrated to provide more holistic approach towards the health care.

Free dentures are provided under danta bhagya yojana.
